

Paweł Serafin

Senior .Net Developer

19 years of experience

SUMMARY

I have over 19 years of experience in software development, primarily as a .NET Developer. I am experienced in creating technical documentation, designing and developing new functionality, building integration solutions, maintaining, refactoring, and extending existing code, as well as software testing across both on-premises and cloud (Azure) environments, spanning backend and frontend technologies. I am skilled in MS SQL query optimisation. I am focused on full-stack development and comfortable taking on leadership roles within projects. I use AI tools, including Claude, to improve my work and productivity. I am a team player, open-minded, and willing to share my knowledge with others.

Sector's knowledge Financial, e-Commerce, Car-Sharing,
Psychometrics, SFA/CRM, etc.

Programming languages and frameworks C#, .Net Framework (4.7), .Net (6 - 10), Azure,
Angular, TypeScript, RxJs, NgRx, Angular CLI,
Material Design, PrimeNG, Nebular, ng-
bootstrap, JavaScript jQuery, JSON, HTML, XML,
CSS/SCSS,
Blazor, SignalR, MediatR, Graph API, SharePoint,
OpenXML, Terraform,
Azure: Data Factory, Key Vault, App Service (+
slots), Function App, Logic App, SQL Server,
Cloud Solutions Storage (Blobs/Tables/Queues), Virtual Machine,
Entra AD, Service Bus, APIM, Front Door, VNET
integration, App Insights, Arm Templates
Databases MSSQL Azure DB, Azure Storage (noSQL), DB2,
Snowflake

Patterns Event-Drive Architecture, Rest API, Data migration, DDD, SPA with Angular, Mediator, CQRS, SOLID, KISS, Clean/N-tier Architecture, Microservices, etc. etc.

Version control systems GIT, SVN, TFS

Project management methodologies Agile, Scrum

Project management tools Jira, Azure DevOps, Customer dedicated tools

Tools for software building and testing Visual Studio, Visual Studio Code, SQL Server Management Studio, Microsoft Azure Storage Explorer

Other tools Postman, Git Extension, Notepad++, internet browser DevTools

PROFESSIONAL EXPERIENCE

Guest TEK 3 months

TIER 1 SUPPORT AGENT (2007)

Project description:

- Call center support agent

Tasks:

- Resolving technical and software issues related to customers' internet access

Asseco Poland S.A. 2 years

COBOL DEVELOPER (2007 – 2009)

PKO BP S.A. Project:

Project description:

- ▶ Implementation of the Alnova System (main transactional system) for PKO BP S.A.
- ▶ Business Partner: PKO BP S.A. (Polish bank)

Tasks:

- ▶ Designing: High Level (business) and Data Designs (technical)
- ▶ Software development (JCL, Cobol, DB2)
- ▶ Document management (MS SharePoint)
- ▶ Testing and bug fixing
- ▶ Adjusting Application and DB Performance

Technology Stack:

- ▶ JCL, Cobol, DB2, SharePoint

Asseco Business Solutions S.A.

5 years

DEVELOPER (2009 – 2015)

Factor Project:

Project description:

- ▶ Development of Invoice Factoring Application
- ▶ Business Partners: Millennium Bank, BOŚ, BPS, Deutsche Bank, Raiffeisen Bank, Pekao S.A.

Tasks:

- ▶ Software development (PowerBuilder 10, MSSQL)
- ▶ Creating integration platforms (C#, CLR functions, WCF)
- ▶ Creating documentation
- ▶ Testing and bug fixing
- ▶ Maintenance of existing code
- ▶ Adjusting Application and DB Performance

Technology Stack:

- ▶ PowerBuilder 10, MSSQL (2005-2008), C#, CLR functions, WCF

Mobile Touch Project:

Project description:

- ▶ Development of SFA/CRM application
- ▶ Business Partners: Nestle, Mondelez International, Lotte Wedel, Tchibo, Hortex Holding

Tasks:

- ▶ Development of company common platform (NeoN)
- ▶ Based on NeoN development of business specific products like Mobile Touch, Invoice Factor
- ▶ Testing and bug fixing
- ▶ Adjusting Application and DB Performance

Technology Stack:

- ▶ C#, .NET 4.5, WCF, Silverlight, MSSQL (2008-2014), Entity Framework

SII

6 years

SENIOR .NET DEVELOPER (since 2015)

Pekao S.A. Project:

Projects description:

- ▶ ModulGF – tax document registration management
- ▶ Stawki – automation of reference rate computation
- ▶ EPU – communication management and integration between Bank and e-Court
- ▶ Full Stack development

Tasks:

- ▶ Software development
- ▶ Creating documentation
- ▶ Testing and bug fixing
- ▶ Maintenance of existing code

- ▶ Adjusting Application and DB Performance

Technology Stack:

- ▶ C#, .NET (4.0), MVC, jQuery, JSON, HTML, CSS, Razor, Rest API, MSSQL (2012), Entity Framework

PKN Orlen Project:

Project description:

- ▶ eHurt, oneHurt – electronic service for wholesale petrol and asphalt products
- ▶ Full Stack development

Tasks:

- ▶ Software development
- ▶ Migrating existing functionalities to new platform
- ▶ Testing and bug fixing
- ▶ Designing new functionalities

Technology Stack:

- ▶ C#, .NET (4.6), .NET Core (starting from beta => 2.0), Angular 2 (beta => final 2.0), MVC, TypeScript, JavaScript, jQuery, HTML, CSS, PrimeNG, Bootstrap, JSON, MSSQL 2012, Entity Framework

Hoist Finance Project:

Project description:

- ▶ Supporting customer DEV team
- ▶ Cooperating directly with the German branch

Tasks:

- ▶ Creating dedicated integration functionalities between customer systems
- ▶ Creating tools for processing OpenOffice template files
- ▶ Analysing existing code for documentation purposes

Technology Stack:

- ▶ C#, .NET (4.6), XML, OpenOffice

SII Notifier Project:

Project description:

- ▶ Creating web application for managing company resources (workers, working time, projects)
- ▶ The main goal of this project was to train students (interns) who were participating in SII action LAT (Summer Talent Academy)
- ▶ As a Team Leader, I was responsible for training interns in new technologies and project standards, and for providing them with good work experience on a real-life project
- ▶ After the training all trainees were employed by SII
- ▶ Full Stack project

Tasks:

- ▶ Gathering business requirements
- ▶ Designing solution architecture
- ▶ Training interns
- ▶ Creating progress reports

Technology Stack:

- ▶ C#, .NET Core (2.0), Angular (6), MVC, TypeScript, RxJS, HTML, SCSS, JSON, PrimeNg, Nebular, Entity Framework, Azure DB, Azure (CI/CD on DevOps, App Services, AAD)

ABB Project:

Project description:

- ▶ MXP Self Service – creating web application which helps maintain ships turbocharges

Tasks:

- ▶ Software development
- ▶ Testing and bug fixing

Technology Stack:

- ▶ C#, .NET (4.6), MVC, Rest API, XML

Gyldendal Project:

Project description:

- ▶ Creating library used for transforming law files written in xml into new format
- ▶ Working directly with business Customer

Tasks:

- ▶ Software development
- ▶ Testing and bug fixing
- ▶ Responsible for all communication with Customer
- ▶ Gathering business requirements from the Customer and preparing needed documentation

Technology Stack:

- ▶ C#, .NET Standard, XML

Ingenico Project:

Project description:

- ▶ Creating web app for maintaining payment terminals
- ▶ Full Stack development

Tasks:

- ▶ Software development
- ▶ Testing and bug fixing

Technology Stack:

- ▶ C#, .NET Core (2.1), Angular (5), MVC, TypeScript, RxJS, JavaScript, jQuery, HTML, CSS, Bootstrap, JSON, MSSQL (2016), Entity Framework, Azure (CI/CD with DevOps, App Services)

Bilpoolen Project:

Project description:

- ▶ Maintaining web app for car-sharing company
- ▶ Full Stack development

Tasks:

Paweł Serafin

Senior .Net Developer

- ▶ Software development (mainly maintenance)
- ▶ Testing and bug fixing

Technology Stack:

- ▶ C#, .NET (4.5), MVC, TypeScript, JavaScript, jQuery, HTML, CSS, Bootstrap, JSON, MSSQL (2012), Entity Framework

SII Spot Project:

Project description:

- ▶ Creating web application for managing parking lots in one of the SII Offices
- ▶ This project was designed and created independently, during downtime between assignments
- ▶ Full Stack development

Tasks:

- ▶ Gathering business requirements
- ▶ Designing solution architecture
- ▶ Development and bugfixes

Technology Stack:

- ▶ C#, .NET Core (3.0), Angular (8), MVC, TypeScript, RxJS, NgRx, HTML, SCSS, JSON, Material Design, Azure (CI/CD with DevOps, Azure App Services, Azure Storage)

Leica Geosystems Project:

Project description:

- ▶ BLK3D Web – creating web application for measurement of objects on images
- ▶ Full Stack development

Tasks:

- ▶ Software development
- ▶ Testing and bug fixing

Technology Stack:

- ▶ C#, .NET Core (2.2), Angular (7), MVC, TypeScript, RxJS, NgRx, HTML, SCSS, Material Design, JSON, Azure Storage , Azure (CI/CD with DevOps, App Services)

10x Psychology Project:

Project description:

- ▶ 10xDashboard/10xAssesment – creating web application managing/improving people performance in the workplace
- ▶ Creating migration services using Azure Data Factory

Tasks:

- ▶ Software development
- ▶ Creating mechanism for templating Interview Guides (OpenXml)
- ▶ Creating Disaster Recovery mechanism (backups and restoration of business data and services)
- ▶ Testing and bug fixing
- ▶ Improving application performance
- ▶ Implementing Azure B2C Authentication as alternative authorisation method
- ▶ Creating data migrations with Azure Data Factory

Technology Stack:

- ▶ C#, .Net (4.8), .NET Core (2.2/3.1), MSSQL, Word.Interop, OpenXml, Azure DevOps CI/CD, Azure (Data Factory, Key Vault, App Service (+ slots), Function App, Logic App, SQL Server, Storage (Blobs/Tables/Queues), Virtual Machine, Active Directory (B2C), Application Insights, Arm Templates)

Shimi _____ over 4 years

LEADER/SENIOR .NET DEVELOPER (since 2021)

NDA (non-disclosure agreement) London Market Insurance Company:

Project description:

- ▶ Migrating policy data; creating integration between customer and external systems

Tasks:

- ▶ Preparing solution architecture
- ▶ Business analysis
- ▶ Software development
- ▶ Preparing documentation
- ▶ Performing analysis of existing customer applications, preparing data mapping spreadsheets

Technology Stack:

- ▶ C#, .NET (6.0), Snowflake, MSSQL, IaC: Terraform + CI/CD with DevOps, Azure hosted (Data Factory + SHIR, Service Bus, Function App, VNET integration, Storage Account, APIM, Front Door, OAuth2 + Azure AD), brief work with Angular 6

Project description:

- ▶ Migrating insurance documents (sourced from internal storage, SQL binaries) to SharePoint

Tasks:

- ▶ Preparing solution architecture
- ▶ Working with infosec team to ensure security and compliance of the solution
- ▶ Business analysis
- ▶ Software development
- ▶ Preparing documentation
- ▶ Performing analysis of existing internal applications and storage solutions
- ▶ SharePoint integration (PnP Framework)

Technology Stack:

- ▶ C#, .NET (6.0), Intranet storage, MSSQL, SharePoint (PnP Framework), OpenXml (preparing reporting tool)

Project description:

- ▶ Creating policy/claim management application

Tasks:

- ▶ Preparing solution architecture

- ▶ Event-Driven architecture design and implementation (Azure Service Bus, Azure Function App)
- ▶ Working with infosec team to ensure security and compliance of the solution
- ▶ Working directly with business analytics to gather business requirements
- ▶ Software development
- ▶ Preparing documentation
- ▶ Performing analysis of existing internal applications (data sourcing)
- ▶ Code migration to latest framework versions
- ▶ Creating integration API's (.Net Http-based endpoints), Function App, APIM
- ▶ SharePoint integration (Graph API)
- ▶ User account management (Azure AD, OAuth2, OpenID Connect, Graph API)
- ▶ Creating deterministic indexation mechanism for SharePoint documents

Technology Stack:

- ▶ C#, .NET (10.0), Blazor Server, Azure (Function App, Service Bus, APIM, Key Vault, Front Door, VNET integration, Azure AD, Graph API), MSSQL, SharePoint (Graph API), OpenXml (preparing reporting tool)

LATEST REFERENCES

Bernie, 10x Psychology:

- ▶ Work efficiency - Paweł is very efficient with his work and is considered one of the strongest members of our development team. It's not uncommon that Paweł is tasked with difficult work, i.e. manually replicating our production environment and diagnosing an array of technically challenging issues at the same time, working with Azure Data Factory to move data between systems and perform various other tasks, not to mention his daily work on feature development. I have never received any complaints from his team lead or project manager, which is a very positive sign as they have very high standards regarding team member efficiency
- ▶ Quality of work - Paweł tries his best to work to a high standard. Through no fault of his own there are certain constraints at 10x that limit his quality from being that of a higher standard I see in the new green field solutions being developed but in the spaces, he works in, i.e. our legacy code base and Azure infrastructure he's doing a great job. He has gone above and beyond on several tasks - documenting the procedures for others saving them time in the future.
- ▶ Teamwork - Paweł is well respected by the team and is always willing to pick up tasks that aren't particularly pleasant but are important to get done. His honesty is also a positive here as he's not afraid to ask for

Paweł Serafin

Senior .Net Developer

assistance on any task where he's not qualified enough to make an informed decision - I would rather this approach than a staff member guessing their way through a task and losing sight of timeframes and budget.

- ▶ Learning ability - Looking at examples of how he's picked up Azure Data Factory, or other technologies in Azure, show me that he clearly has a strong learning ability. At 10x we have a very broad range of technologies, not to mention new/old approaches to development and Paweł works well with them all, developing his knowledge and skills to meet these learning challenges as they arise. I can remember more than one occasion where he's left tips for me on implementation/configuration steps to ensure the smooth completion of my tasks as they've carried on after he's done the hard work
- ▶ Timeliness - Paweł is as precise with his time as anyone can be expected in the areas he works. As mentioned above he isn't exactly given the simplest of tasks so time estimation can be a difficult prospect - regardless, he does a good job on this front, and I haven't had any concerns raised from his lead developer. He has made himself available outside of hours to complete work, extended offers to be contactable if he's needed, and when I contact him to thank him for his work on whatever complex/difficult task he's been assigned he always says "it's his job" in the most humble manner. I hope we can continue working with Paweł for the foreseeable future, growing his skillset and experience

Nick Towers, Product Manager at Hiscox:

- ▶ I have had the pleasure of working closely with Paweł for almost five years as he helped design and build our proprietary London Market claims workbench, and I can say without hesitation that he has been one of the most capable and dependable engineers I've worked with.
- ▶ Technically, Paweł is exceptional. He has a deep, end-to-end understanding of complex systems — from integration architecture through to front-end behaviour — and he architected and delivered foundational, core workbench features, including search engine, document management features, vendor integration, and user role and access management. He doesn't just write code; he understands why the system behaves as it does, anticipates edge cases, and designs solutions built to last.
- ▶ What has always impressed me most is how well Paweł understands our end users. He doesn't just build to a spec — he thinks about how claims handlers will actually use the system day to day and consistently weighs up the trade-offs between feature functionality and optimising performance, making sensible calls that kept the product both powerful and genuinely usable.
- ▶ Beyond his technical skill, Paweł is someone who sets clear direction. He regularly established architectural design from concept, and presented demos to the wider team, explained difficult concepts clearly, and generously supported colleagues to raise the quality bar around him.
- ▶ What sets Paweł apart is his work ethic and the consistency of his output. He took genuine ownership, held himself, his team, and our vendors to high standards, and delivered reliably even against tight deadlines — without ever compromising on quality.
- ▶ Any team would be fortunate to have Paweł. I recommend him wholeheartedly

EDUCATION

Paweł Serafin

Senior .Net Developer

2002 – 2007 **Master of Science. University of Maria Curie-Sklodowska in Lublin**

Specialization: Computer science

2006 – 2007 **Bachelor of Economics. University of Maria Curie-Sklodowska in Lublin**

Specialization: Economy

CERTIFICATES

- ▶ Advanced DB SQL (IBM)
- ▶ Project management – Prince 2
- ▶ MS-10262 Developing Windows Applications with Microsoft Visual Studio 2010 [WPF, ASP.NET]
- ▶ TELC Certificate in English B1

COURSES

- ▶ Advanced MS SQL
- ▶ T-SQL tuning and performance
- ▶ Microsoft Azure Architecture – AZ300 & AZ301
- ▶ Kubernetes
- ▶ Advanced Angular 7
- ▶ C# Programming (.NET 4.0/4.5, Silverlight, WCF)
- ▶ Design patterns in C
- ▶ Domain-Driven Design
- ▶ Advanced JavaScript
- ▶ Control-M, CICS, JCL, COBOL, DB2
- ▶ Advanced DB SQL (IBM)

FOREIGN LANGUAGES

- ▶ English - Advanced
- ▶ German – Basic
- ▶ Swedish - Basic

PASSIONS & HOBBIES

Paweł Serafin

Senior .Net Developer

- ▶ Family – in the past, work and programming were my biggest passions; nowadays, my family is my greatest passion and love, filling every free moment of my life
- ▶ Volleyball – one of the few activities I still make time for, alongside family life
- ▶ Sense of humour – it's always good to brighten up the working day a little

I hereby give consent for my personal data to be processed for the purpose of conducting recruitment for the position for which I am applying.
